---

SUMMARY

- Full Stack Developer with around 3 years of experience in **development**, **enhancement**, and **technical support.**
- Experience in all phases of **SDLC** like **Requirement Analysis**, **Implementation** and **Maintenance** and good experience with **Agile** and **Waterfall**.
- Proficient in a wide range of front-end technologies, including **HTML**, **CSS**, **JavaScript**, and modern front-end libraries/frameworks such as **React & NextJS**.
- Experienced in collaborating with cross-functional teams and clients from diverse industries, including **E-commerce and finance.**
- Strong design sensibility and an eye for detail, with a focus on delivering responsive and visually appealing **web interfaces**.
- Working Experience in building responsive and interactive **Single Page Applications** (**SPAs**) using **React**.
- Possesses a track record of leading successful projects from concept to deployment, **optimizing code efficiency**, and ensuring **robust** and **user-centric applications**.
- Proficient in using **NOSQL** libraries and databases like **MongoDB** and relational databases like **PostgreSQL** databases.
- Demonstrated adaptability and problem-solving skills, consistently delivering solutions within strict timelines and resource constraints.

SKILLS

Frontend Skills:	HTML, CSS, JavaScript, TypeScript, React, NextJS
Backend Skills:	NodeJS, ExpressJS, Rest API
Databases:	MongoDB, PostgreSQL
Other Frameworks & Library:	Redux, SASS, Bootstrap, jQuery, JSON, XML, Rest API, Redux, AJAX, ESLint, Webpack, JWT Micrservices, Styled-Component, Material-UI, WebSocket, Jira
IDEs:	Visual Studio Code, Sublime Text, Notepad++
Version Control Tools	Git ,GitHub, GitLab, BitBucket, TortiseSVN

EXPERIENCE

Casperon Technologies, India | Software Developer **April 2022 - June 2024**

- Worked closely with cross-functional teams to gather requirements, contributing to the successful launch of new website features and enhancements.
- Developed reusable and efficient code using modern frontend technologies **like HTML5, CSS3, JavaScript (ES6+), and frameworks and libraries such as React & NextJS.**
- Collaborated with **UX/UI designers** to implement pixel-perfect designs, resulting in consistent visual aesthetics and user-friendly interfaces.
- **Built RESTful APIs with NodeJS** to support real-time features and dynamic data retrieval in web applications.
- Led the development of a **mobile-centric website** and successfully **implemented Microfrontend architecture** to optimize user load distribution across existing projects.
- **Designed and integrated Microservice architecture**, significantly reducing system load and enhancing overall efficiency.
- Focused on enhancing applications' performance, data quality, scalability, operability, and adaptability.
- Conducted performance testing and optimization of Node.js applications to improve scalability and responsiveness.
- Drove website modernization initiatives to enhance the user experience and implemented **SEO strategies**, resulting in a remarkable **200% increase in unique website visits**.
- Collaborated closely with **Mobile App Developers, offering backend support** and ensuring seamless integration.
- Designed and developed user interfaces using Bootstrap, ensuring consistency and **responsiveness across multiple devices**.
- Improved **website speed and performance** by optimizing images, utilizing caching, and reducing unnecessary re-renders.
- Developed and deployed a software update, resulting in a **30% reduction in system errors** and **improving application performance by 25%**.

Confluxus.io, India | Software Developer **Sept 2021 - April 2022**

- Developed a web application using ReactJS that streamlined the management of injury player lists and their details for Fantasy Football Predictors.
- This application significantly reduced the time required to identify current injury players. Worked on an application that utilized **ReactJS, NextJS, JavaScript, CSS, and NodeJS** as backend.
- Contributed to an application that leveraged ReactJS, NextJS, JavaScript, CSS, and NodeJS for the backend. Additionally, Implemented dynamic metadata to optimize website pages for SEO purposes.
- Developing 3+ web applications by **using responsive UI** Elements via React concepts for smooth performance.
- Performing testing and debugging source code for better performance with a team of 3 individuals.
- Experience in working within an agile software development environment, ensuring efficient and collaborative project execution.

EDUCATION

Bachelor of Technology in Electronics Engineering | March - 2020

SRM, Chennai
