SUMMARY

Full Stack Developer with **4.9 years of experience** building scalable enterprise web applications **across CRM, sales, finance, and e-commerce domains**. Specialized in **React 19, TypeScript, Next.js, Node.js, and Spring Boot**, with proven expertise in modernizing **legacy Angular** applications, designing **micro-frontend and microservice architectures**, and developing high-performance, data-driven applications. Experienced **in integrating Salesforce, Google Workspace, REST APIs**, and AI-powered solutions using **AWS Bedrock (Claude)**, while delivering secure, role-based enterprise applications. Proficient in leveraging AI-assisted development tools such as **Claude Code and Cursor AI** to accelerate software delivery, improve code quality, and enhance engineering productivity. Strong track record of collaborating with cross-functional teams to deliver scalable products that improve operational efficiency and support business growth.

SKILLS

Frontend	HTML5, CSS3, JavaScript, TypeScript, React 19, Next.js, Angular, Micro-Frontend Architecture
Backend	Node.js, Express.js, REST API, Python, Microservices
Databases	MongoDB, PostgreSQL
AI & Productivity	Claude Code, Cursor AI, Prompt Engineering, AI-assisted Development, AWS Bedrock
DevOps tools	AWS, Docker, Jenkins, CI/CD
State & Build	Redux Toolkit, Vite 7, Vitest, Webpack, ESLint, Jest
UI Libraries	SASS, Bootstrap, Material-UI, Styled-Components, Tailwind
Other	JWT, WebSocket, Swagger, Jira
Version Control	Git, GitHub, GitLab, BitBucket, TortoiseSVN
IDEs	Visual Studio Code, Cursor, Antigravity, Sublime Text

EXPERIENCE

Kloze.Ai, United States | Fullstack Developer *June 2024 – Present*

- Built **AI-driven sales intelligence workflows** that analyzed customer emails, meetings, and CRM data to generate lead summaries, company profiles, MEDDIC insights, and recommended next actions for sales teams.
- Implemented **AI-powered meeting intelligence** using **speech-to-text transcription and AWS Bedrock** to generate meeting summaries, extract decisions, action items, customer pain points, and perform sentiment analysis**, improving sales productivity**.
- Developed **AI-powered email intelligence** using Gmail API and AWS Bedrock to summarize customer conversations, identify buying signals, and generate contextual CRM updates.
- Leading phased migration of a **legacy Angular 8 to React 19**, rebuilding **12+ modules** with no disruption to production workflows.
- Designed and developed **role-based Executive, Manager, and Seller dashboards** with dynamic permission-based navigation, enabling secure access to sales analytics and operational workflows.
- Developed **CRM/email integration** flows (Salesforce, Gmail, Outlook, HubSpot) and Google/Outlook SSO with persistent auth and session filter restoration.
- Delivered Critical Alerts, KAI Insights, User Management, and Excel export features **supporting day-to-day sales operations**.

- Developed **Google Workspace Domain-Wide Delegation** (DWD) integration enabling enterprise Gmail access without per-user OAuth, including user designation management, Google Admin Directory API sync, and DWD health verification.
- Built **cross-microservice** SLA monitoring dashboard aggregating email sync, Salesforce CRM sync, and email write-back issues **across 3 Spring Boot services** using Feign clients and REST APIs.
- Developed and deployed a software update resulting in a **80% reduction in system errors** and **improved rendering performance by 2.5×**.
- Contributed to initiatives that supported a **40% increase in sales revenue** by delivering performance-optimized CRM dashboards, sales analytics, and engagement insights that improved data-driven decision-making.

Casperon Technologies, India | Software Developer *April 2022 – June 2024*

- Developed reusable and efficient code using modern frontend technologies like **HTML5, CSS3, JavaScript (ES6+), React & Next.js**.
- Collaborated with UX/UI designers to implement pixel-perfect designs, resulting in consistent visual **aesthetics and user-friendly interfaces**.
- Built **RESTful APIs with Node.js** to support real-time features and dynamic data retrieval in web applications.
- Led the development of a **mobile-centric website** and successfully implemented **Micro-frontend architecture** to optimize user load distribution across existing projects.
- Designed and integrated **Microservice architecture**, significantly reducing system load and enhancing overall efficiency.
- Conducted performance testing and **optimization of Node.js** applications to improve scalability and responsiveness.
- Drove SEO modernization initiatives resulting in a **200% increase in unique website visits**.
- Collaborated closely with **Mobile App Developers, offering backend support** and ensuring seamless integration.
- Designed and developed user interfaces using **Bootstrap**, ensuring consistency and responsiveness across multiple devices.
- Improved **website speed and performance** by optimizing images, utilizing caching, and reducing unnecessary re-renders.
- Developed and deployed a software update resulting in a **30% reduction in system errors** and **25% improvement in application performance**.

Confluxus.io, India | Software Developer *Sept 2021 – April 2022*

- Built a **ReactJS + NextJS** web application to streamline injury player tracking for Fantasy Football Predictors, significantly reducing identification time for analysts.
- Implemented **responsive and adaptive UI** components that provided consistent user experiences across desktop, tablet, and mobile platforms while adhering to modern accessibility and usability standards.
- Implemented dynamic metadata and **SEO optimizations across 3+ web applications**, improving search visibility and organic reach.
- Collaborated in an **agile team of 3**, handling testing, debugging, and performance optimization to ensure responsive and reliable user interfaces.

EDUCATION

B.E in Electronics Engineering *March 2020*

SRM, Chennai
