SIDDHARTH MANIMARAN

Full Stack Developer

+91-8667385532 • siddharths.vercel.app • siddharth.goldengrove@gmail.com • India

SUMMARY

Full Stack Developer with 4+ years of experience building scalable web applications across e-commerce and finance domains. Proficient in **React 19, TypeScript 5, Next.js, Node.js**, and Redux Toolkit. Experienced in leading frontend migrations, implementing micro-frontend and microservice architectures, and delivering performance-optimized, user-centric SPAs. Comfortable working across the full SDLC in Agile and Waterfall environments, collaborating with cross-functional teams and UX/UI designers. Proven ability to lead end-to-end frontend architecture decisions, from state management design to build tooling modernization, with a track record of migrating legacy codebases to modern stacks with zero downtime. Strong communicator with experience working directly with clients, mobile developers, and design teams across diverse industries.

SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), TypeScript 5, React 19, Next.js, Angular
Backend	Node.js, Express.js, REST API
Databases	MongoDB, PostgreSQL
State & Build	Redux Toolkit, Vite 7, Vitest, Webpack, ESLint
UI Libraries	SASS, Bootstrap, Material-UI, Styled-Components
Other	JWT, WebSocket, Microservices, Micro-frontend, AJAX, jQuery, JSON, XML, Jira
Version Control	Git, GitHub, GitLab, BitBucket, TortoiseSVN
IDEs	Visual Studio Code, Sublime Text, Notepad++

EXPERIENCE

Kloze.Ai, United States | Fullstack Developer *June 2024 – Present*

- Spearheading the phased migration of a legacy **Angular 8 + NgRx** application to **React 19 + TypeScript 5**, ensuring zero disruption to existing business workflows.
- Rebuilt 10+ core modules including Dashboards, User Management, and Critical Alerts using a modular frontend architecture.
- Standardized global state management with **Redux Toolkit** (async thunks/selectors), significantly reducing logic duplication.
- Implemented persistent authentication and filter-state restoration to ensure UX continuity across complex user journeys.
- Modernized the development lifecycle by integrating **Vite 7 and Vitest**, resulting in faster iteration cycles and more reliable releases.

Casperon Technologies, India | Software Developer *April 2022 – June 2024*

- Worked closely with cross-functional teams to gather requirements, contributing to the successful launch of new website features and enhancements.
- Developed reusable and efficient code using modern frontend technologies like **HTML5, CSS3, JavaScript (ES6+), React & Next.js**.
- Collaborated with UX/UI designers to implement pixel-perfect designs, resulting in consistent visual aesthetics and user-friendly interfaces.
- Built **RESTful APIs with Node.js** to support real-time features and dynamic data retrieval in web applications.

- Led the development of a **mobile-centric website** and successfully implemented **Micro-frontend architecture** to optimize user load distribution across existing projects.
- Designed and integrated **Microservice architecture**, significantly reducing system load and enhancing overall efficiency.
- Conducted performance testing and optimization of Node.js applications to improve scalability and responsiveness.
- Drove SEO modernization initiatives resulting in a **200% increase in unique website visits**.
- Collaborated closely with Mobile App Developers, offering backend support and ensuring seamless integration.
- Designed and developed user interfaces using Bootstrap, ensuring consistency and responsiveness across multiple devices.
- Improved website speed and performance by optimizing images, utilizing caching, and reducing unnecessary re-renders.
- Developed and deployed a software update resulting in a **30% reduction in system errors** and **25% improvement in application performance**.

Confluxus.io, India | Software Developer *Sept 2021 – April 2022*

- Built a ReactJS + NextJS web application to streamline injury player tracking for Fantasy Football Predictors, significantly reducing identification time for analysts.
- Implemented dynamic metadata and SEO optimizations across 3+ web applications, improving search visibility and organic reach.
- Collaborated in an agile team of 3, handling testing, debugging, and performance optimization to ensure responsive and reliable user interfaces.

EDUCATION

B.Tech in Electronics Engineering *March 2020*

SRM University, Chennai
